RESOLUTION NO. 2404

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF BONNEY LAKE, PIERCE COUNTY, WASHINGTON EXPRESSING THE INTENT TO ADOPT A COMMUNITY DEVELOPMENT ELEMENT.

WHEREAS, RCW 36.70A.130(4) requires the City of Bonney Lake to review and revises, if needed, its Comprehensive Plan and development regulations by June 30, 2015 to ensure compliance with the Growth Management Act (GMA) – Chapter 36.70A RCW; and

WHEREAS, Council passed Resolution 2379 directing staff to prepare amendments to the Comprehensive Plan consist with the Bonney Lake 2035 – Consistency Report; and

WHEREAS, the Bonney Lake Planning Commission has reviewed the proposed amendments to the Comprehensive Plan related to Land Use, Housing and Community Character on May 21, 2014, June 4, 2014, July 2, 2014 and July 16, 2014; and

WHEREAS, the Bonney Lake Planning Commission conducted a public hearing on the proposed amendments to the Comprehensive Plan related to Land Use, Housing and Community Character on August 13, 2014.

NOW, THEREFORE, BE IT RESOLVED the City Council of the City of Bonney Lake provides notice of its intent to adopt the Community Development Element of the Comprehensive Plan, attached as Attachment, combining the Land Use, Housing, and Community Character Elements as part of the Comprehensive Plan Update required to be completed no later than June 30, 2015.

BE IT FURTHER RESOLVED, that the City staff is directed to the Community Development Element in the version of the Comprehensive Plan that will be brought back to the City Council for final consideration.

PASSED by the City Council and approved by the Mayor this 14th day of October, 2014.

AUTHENTICATED:

Hatwood T. Edvalson, MMC, City Clerk

APPROVED AS TO FORM:

Kathleen Haggard, City Attorney

Neil Johnson, Jr., Mayor

1. INTRODUCTION

The Community Development Element establishes the policy framework that will shape the physical development of Bonney Lake and fulfills the requirements of Revised Code of Washington (RCW) sections 36.70A.070(1) and 36.70A.070(2) that local comprehensive plans address land use and housing. The City choose to combine the required land use element and housing element into one element due to the significant interrelatedness of these issues and the role these issues play in improving the health of the residents of Bonney Lake. Specific characteristics of built environment that hold the potential to enhance community social capital and create a corresponding improvement in the health of the community related to land use and housing including encouraging mixed land uses, creating meeting destinations such as parks or other public spaces, providing neighborhood walkability, and ensuring the upkeep of the community.1

While all elements of the Comprehensive Plan have equal weight under the Growth Management Act (GMA) – Chapter 36.70A RCW, seven of the fourteen goals of the GMA specifically pertain to land use and housing:

- **Urban Growth.** Encourage development in urban areas where adequate public facilities and services exist or can be provided in an efficient manner.

- **Reduces Sprawl.** Reduce the inappropriate conversion of undeveloped land into sprawling, low density development.

- **Housing.** Encourage the availability of affordable housing to all economic segments of the population of this state, promote a variety of residential densities and housing types, and encourage preservation of existing housing stock.

- **Property Rights.** Private property shall not be taken for public use without just compensation having been made. The property rights of landowners shall be protected from arbitrary and discriminatory actions.

---

1. Plan for Bonney Lake, Washington May 2, 1964
Permits. Applications for both state and local government permits should be processed in a timely and fair manner to ensure predictability.

Open Space and Recreation. Encourage the retention of open space and development of recreational opportunities, conserve fish and wildlife habitat, increase access to natural resource lands and water, and develop parks.

Citizen participation and coordination. Encourage the involvement of citizens in the planning process and ensure coordination between communities and jurisdictions to reconcile conflicts.

The Community Development Element is also crucial to guiding the City toward being a sustainable suburb with a land use pattern that consumes less energy; is less dependent on automobiles; supports local businesses; promotes public health, and is inclusive of persons of all ages, income levels, and physical capabilities. The Element has also been carefully integrated with the Mobility Element to promote a future development pattern that reflects the opportunities and constraints of the transportation system.

The Element is divided into five sections. The first section provides an overview of existing conditions at a citywide level. The second section address the city growth projections over the twenty year planning horizon of the Comprehensive Plan. The third section presents the Future Land Use Map and Land Use Designations. It uses color coded categories, which are defined in detail in this Element, to show the land use intent over the twenty year time horizon of the Comprehensive Plan. The forth section identifies the Potential Annexation Areas within the current Bonney Lake Urban Growth Area (BLUGA) and Potential Annexation Areas that the City has identified to be added to the BLUGA, some of these areas are located within the Comprehensive Urban Growth Area (CUGA) and some are located outside of the CUGA. The fifth section of the address development patterns within Bonney Lake. The policies guide day-to-day City decisions on topics such as land use compatibility, housing, hillside protection, and the review of new development. The final section address the protection of property rights which is one of the goals of the growth management act.

2. VISION

The citizens of Bonney Lake envision a City that conserves the areas natural and scenic amenities; that strives for a balanced community that enhances the existing residential character with a thoughtful blending of economic activities; promotes a safe, attractive, and healthy living environment with a variety of physical, educational, economic, and social activities; that develops actionable and descriptive plans to guide development and to ensure that capital facilities and public services are available and adequate to serve the current and future residents; and that tax revenue are used in an efficient and transparent manner to provide services to the residents of the community and to enhance the quality of life in the City of Bonney Lake.
3. EXISTING CONDITIONS

3.1 POPULATION

The total population within the incorporated boundaries of Bonney Lake as of April 1, 2014 is 18,520 according to the Washington State Office of Financial Management (OFM) making Bonney Lake the fifth most populous city in Pierce County. The City has experienced rapid population growth over the last sixty-five years due to extensive single family residential development and annexations.

Bonney Lake has had an annual average growth rate of 2.1% over the 30 year period from 1980 to 2010: excluding growth due to annexations. The population of Bonney Lake is predominately younger with over three quarters of the City's population under the age of 50. The largest segment of Bonney Lake's population is between the ages of 30 and 49: representing over a third of the City's population.

While understanding the ages of the population within a community is important, the typically age groupings can span multiple generational cohorts. For example, the age grouping of 30 to 49 spans three generational cohorts: the Baby Boomer Generation, Generation X, and the Millennial Generation. The generational spit of a community is crucial as each cohort approaches housing and other land use issues with different attitudes and expectations. Three generational cohorts represent over three quarters of the population in the Bonney Lake: the Baby Boomer Generation, Generation X and the Millennial Generation.

![Figure 2-3: Bonney Lake's Generational Makeup](image)

As the City plans for the next twenty years, understanding the attitudes and desires of the Baby Boomer Generation and the Millennial Generation will be critical. By the end of the planning horizon in 2035, these two cohorts will be making major transitions in their lifestyles: the youngest members of the Baby Boomer Generation will be 71 and the youngest member of the Millennial Generation will be 35.

Members of the Millennial Generation are looking for places to live that are affordable and can provide a lifestyle similar to the downtowns of large metropolitan centers. Satellite cities and suburban towns will need to evolve to be attractive to this generation as they are looking for communities that provide the ability to walk everywhere; lots of amenities; great public spaces; and access to shopping, dining, and transit. In addition, as the Baby Boomer Generation enters the age of retirement, members of this cohort are looking to trade in their large-lot single-family detached homes in favor smaller-lot single family homes, condos, and townhouses that are located in areas that are walkable, have convenient transit linkages, and good public services (e.g. libraries, cultural activities, senior centers). To remain vibrant suburban cities, such as Bonney Lake, will need to make the switch from a purely auto-centric pattern to more walkable communities with lots of amenities that can be reached efficiently from major job centers via transit in order to attracted these two generational cohorts, which represents the City's, County's, State's, and Nation's two biggest generations.
3.2 ETHNICITY

Approximately 89% percent of the population in Bonney Lake is considered Caucasian and approximately 6% is considered Hispanic. The other 5% of the population consist of African Americans (1.25%), Native American/Alaskan (1%), Asian (2.50%), and Pacific Islander (0.25%).

3.3 EDUCATIONAL ATTAINMENT

In Bonney Lake all most all residents have a high school diploma or equivalent, but only a third have a college degree.

![Figure 2-4: Educational Attainment](image)

3.5 INCOME AND LIFESTYLE

Bonney Lake has a household median income of $77,432, which higher than the median household income Pierce County of $59,105. Bonney Lake has a high median income and relatively uniform distribution of household incomes with three quarters of the households in Bonney Lake making more than $50,000.

![Figure 2-5: Bonney Lake Incomes](image)
Approximately 7% of Bonney Lake households live below 100% of the Federal Poverty Level as compared to the Pierce County average of 9%. The Federal Poverty Level is a sliding scale, based on the total annual income of the household and the number of individuals living in the household. 3.2 LAND USE

Bonney Lake's land use pattern is defined by the City's topography, recreational past, early settlement patterns, transportation network, and location within the nation's thirteenth largest major metropolitan area. When the City incorporated in 1949, it was developed primarily as a bedroom community with residents commuting to the more industrial centers to the north and west for work; a trend that has continued over the last sixty-five years and will likely continue into the future.

Bonney Lake is located on an undulating plateau located between the Puyallup River Valley and the Carbon River Valley. The south shores of Lake Tapps frame the City on the north. Fennel Creek and its associated wetlands and farmlands divide the north and west portions of Bonney Lake from the south and east portion. Geographically, the City is the sixth largest city wholly located in the Pierce County encompassing almost 7.4 square miles (4,727.32 acres). Table 2-2 provides a breakdown of the different land uses within Bonney Lake.

</table>

**Residential Uses**

Bonney Lake has approximately 2,290 acres of residential development. This acreage accommodates 6,759 housing units as of 2014, for an average citywide residential density of 2.95 units per net acre. Some 2,233 acres, or approximately ninety-seven and half percent (97.5%) of the residential total, was developed with single family homes, including mobile and manufactured homes. The average density in these areas is 2.62 units per net acre. This relatively low density reflects the City’s early evolution as an auto-oriented community. Only two and half percent (2.5%) of Bonney Lake’s residential land area is developed with multi-family housing, including duplexes, apartments, and condominiums. Densities in these areas are substantially higher, averaging over 9.36 units per net acre.

Most of the City’s medium and high density uses are located in Downtown, the Lake Tapps Center and East Town Center. The prevailing development form in these areas consists of two to three story garden
apartment complexes and duplexes in landscaped settings. Some of these complexes consist of multiple buildings surrounding shared amenities. Mid-rise residential buildings of four to seven stories do not currently exist.

**Commercial Uses**

Bonney Lake contains approximately 291 acres of commercial development. This includes 19 acres of warehousing and logistic uses, 91 acres of professional office uses and 181 acres of general commercial which includes retail, personal services, restaurants, and entertainment. Bonney Lake's commercial areas serve to provide identity and focal points for subareas in the City. Over the last 20 years, more regionally-oriented shopping areas have emerged. These areas include big-box retailers and smaller retail and restaurant uses.

**Public/Utility/Right-of-Way**

Existing activities in this category include a variety of public uses, transportation facilities, utility infrastructure, governmental buildings, public schools and community facilities. There are approximately 835 acres in this use. Over half of this area is dedicated public rights-of-way and private streets.

**Open Space**

Open Space is the third largest land use in Bonney Lake, encompassing over 518 acres. Open space is classified in several categories including areas set aside for timber or agriculture, lakes, designated greenbelts, conservation areas, private parks and public parks.

**Vacant**

Almost 794 acres of land in Bonney Lake is classified by the Tax Assessor as “vacant.” Vacant sites generally consist of unimproved private properties that are planned and zoned for development. However, some of these properties may be difficult to develop due to environmental and / or access constraints. When constrained or unavailable properties are subtracted out, only about 287 acres of vacant land remain. About 173 acres of vacant land are zoned residential and about 114 acres are zoned commercial or mixed use.
3.3 HOUSING STOCK

As of 2014, Bonney Lake has a total of 6,759 housing units with an average occupancy rate of 0.943335%.\textsuperscript{12} Approximately 83% percent of the housing stock consisting of detached single-family homes. The other 16% of the housing stock is made up of townhomes (attached single-family homes) duplexes, triplexes/four-plexes, apartments, and mobile homes.

![Figure 2-6: Attached Housing Stock Mixture\textsuperscript{13}]

The housing stock in Bonney is relatively new: 62% of the housing units have been constructed since 1990 with almost 40% of all the housing units constructed during the housing boom prior to the 2008 recession.

![Figure 2-7: Housing Unit Age\textsuperscript{14}]

The median house value in Bonney Lake is $273,400 with home prices ranging from less than $50,000 to over a $1,000,000:

![Figure 2-8: Bonney Lake Home Value\textsuperscript{15}]

Bonney Lake Comprehensive Plan
For those residents of Bonney Lake that do not own a home but rent either a detached single-family home or some type of attached housing unit, the median rent is $1,261 with rents ranging from $500 to more than $1,500.

![Figure 2-9: Housing Unit Rents](image)

### 3.4 JOB TO HOUSING RATIO

Communities with more individuals living in the community than working in the community are typically considered suburban or bedroom communities with the majority of the residents leaving during the day. A high imbalance between the number of individuals living and work in same community also contributes to increases commuting times, energy consumption, and the emission of vehicle pollutants, while decreasing the opportunity for non-motorized commuting options (walking and bicycling).

Typically, this balance is expressed by a jobs to housing ratio, which is determining by dividing the total amount of jobs by the total number of housing units in an area. In Washington employment date is typically derived from the Washington State Employment Security Department which identifies the number jobs covered by unemployment insurance within a given area. This measurement of employment does not include the armed forces, jobs with the federal government, self-employed workers, and sole proprietors as this jobs are not “covered” by unemployment insurance. Therefore, the actual total amount of employment is higher than the number of “covered” jobs utilized to calculate the ratio.

Due to the number of dual wage-earning households, a reasonable ceiling signifying balance is a job to housing ratio of 1.5. The Puget Sound Regional Council has established this ratio as a requirement for regional growth centers. Bonney Lake’s job to housing ratio is 0.70 which is lower than the average of Pierce County of 0.97.

The downside of the jobs to housing ratio is that it does not provide the actual number of individuals that live and work in the same community. Another drawback to the methodology is that it treats all housing units as equal even though housing units contain different numbers of workers, consists of retirees, or are vacant.
Another approach is to evaluate the total number of jobs compared to the size of the civilian labor force living in a community. As this measurement compares the total number of individuals in the labor force to the number of jobs, balance is expressed as a one-to-one ratio. Bonney Lake has job to labor force ratio of 0.49 which is nearly half of the average for Pierce County of 0.80.

While both ratios can provide some insight to the nature of a community, neither measure can identify the actual number of people who live and work in the same community as there are a number of variables that are not taken into consideration: nature of jobs within the area, the skills and education of the residents, and the price of housing.

Based on the U.S Census Bureau’s Longitudinal Employer – Household Dynamics (LEHD) data, 15% of labor force in Bonney Lake works and lives within the City.

### 3.5 COMMUNITY HEALTH

A recent report released by the Tacoma/Pierce County Public Health Department indicates that the residents of Bonney Lake have a lower prevalence of coronary heart disease and asthma than the average for Washington and Pierce County, but has other health risk like obesity, diabetes and poor mental health that are higher than the average for Washington.

</tbody>
</table>

Table 2-3: Bonney Lake Health Risk

These health risk are related to community design choices that have not always facilitate walkability or the preservation of green open spaces. The promotion of public health was one of the original and explicit goals of zoning and land use planning when U.S. Supreme Court in 1926 ruled that zoning was an appropriate use of a city’s police powers and was not an unconstitutional taking in *Euclid v. Ambler Realty*.19
4. POTENTIAL ANNEXATION AREAS

The GMA requires that counties coordinate with cities to establish urban growth areas (UGA), which are lands that are, or can be, developed to urban densities with urban services. Only Pierce County can officially designate a UGA, which are generally associated with a particular city representing the area that may annex into that city. UGA must be of sufficient size to accommodate a city's share of the county's population growth for the succeeding twenty-year period. The Bonney Lake Urban Growth Area (BLUGA), as approved by Pierce County, consists of three Potential Annexation Areas (PAA):

1. **Kelly Creek Vista PAA:** The Kelly Creek Vista PAA is located between Church Lake Road East and Fennel Creek containing approximately 93 acres. The area is partial developed, but does include some larger lots that may be further developed when the area is annexed into the City.

2. **Delany PAA:** The Delany PAA consist of two small parcels containing less than 2 acres directly adjacent to SR-410 on the south side east of 229th Avenue East in the East Town subarea.

3. **Victor Falls PAA:** The Victor Falls PAA includes Victor Falls Elementary and is located between the City's southern boundaries and Angelina road east of Fennel Creek. The PAA includes approximately 62 acres.

In addition to these 3 PAAs, the City is also evaluating the possible of adding nine other areas to the BLUGA as PAA's. Some of the areas are currently within the Comprehensive Urban Growth Area (CUGA) established by Pierce County and others are outside of the CUGA, but all were identified for inclusion in the BLUGA in the Comprehensive Plan Update and Draft Environmental Impact Statement Bonney Lake Washington (July 1, 1994). The intent of adding the following areas to the BLUGA is not to perpetuate the conversation of rural lands into urban lands, but to ensure that areas already "characterized by urban growth" as defined by Countywide Planning Policy (CPP) UGA-3.6 are included in the BLUGA boundary:

A. **West Lake Tapps:** This area is also identified as the North Sewer Service Area in the Bonney Lake Comprehensive Sewer System Plan. The West Lake Tapps area covers approximately 2,929 acres which includes approximately 315 acres already within the CUGA, 1,117 acres of Lake Tapps and 1,497 acres of property outside of the CUGA. The area outside of the CUGA contains a variety of land uses including warehouses, medical offices, schools, single-family residences, duplexes, triplexes, four-plexes, and apartments with an overall residential density of 1.97 units per acre. Utilizing Pierce County’s buildable lands methodology, the non-CUGA areas would increase the urban growth capacity by 518 housing units.

Even if the area is not added to the BLUGA, the City is required to provide sewer to the area, both within and outside of the CUGA, pursuant to a 1983 U.S. Environmental Protection Agency Order. This order was issued due to large number of urban density lots next to the west shore of Lake Tapps and the prevalence of surfacing sewage from failed on-site sewer systems in the area.
B. **Fennel Creek Corridor:** The area includes Fennel Creek north of Old Buckley-Sumner Highway and west of 214th Avenue East containing approximately 349 acres. The area is bounded by the City limits or adopted PAAs on the north, west, and south. The area is currently zoned Agricultural Resource Lands (ARL) and Reserve 5. The City is not proposing to add the area the BLUGA to provide capacity, but to protect the area as Open Space. The area would likely be designated Open Space – Conservancy with corresponding zoning classification of RC-5. This designation and zoning is consistent with the same level of development currently allowed under the County's current rural land use designations and zoning classifications which is approximately 15 residential units.

C. **214th Avenue:** This area is bounded by the existing city limits on the north, west, and south, and by 214th Avenue East on the east contain approximately 29 acres. Nearly half of this PAA is covered with wetlands and designated ARL. The City would designate the ARL area as Open Space Conservancy and RC-5 to preserve the resources lands. Utilizing Pierce County’s buildable lands methodology, this area would increase the urban growth capacity by 22 housing units. The primary intent of this expansion to establish a regular boundary between the City and rural Pierce County.

D. **96th Avenue:** This area is bounded by 214th on the west, 96th on the north, 234th on the west, and the existing City boundaries on the south containing approximately 81 acres. The area currently has a residential density of 0.41 housing units per acre. Utilizing Pierce County’s buildable lands methodology, this area would increase the urban growth capacity by 78 housing units and 216 jobs. The intent of this is establish a regular boundary between the City and rural Pierce County.

E. **Entwhistle:** This area is bounded by 214th on the west, the City boundaries on the north, 234th on the west, and the Entwhistle Road on the south containing approximately 97 acres. The area currently has a residential density of 1.55 housing units per acre. Utilizing the Pierce County’s buildable lands methodology, this area would increase the urban growth capacity by 55 housing units and 25 jobs. The primary intent is to establish a regular boundary between the City and rural Pierce County.

F. **Prairie Ridge:** This area is generally bounded by South Prairie Road on the north, 214th on the west and the ridge of the Bonney Lake Plateau on the east and south containing approximately 906 acres. This area was platted in the 1960’s prior to the adoption of the Growth Management Act. The area currently has a net density of 3.74 units per acre. Only 1.7% of the total area or 15.36 acres is currently classified as vacant of which only 9.41 acres or 1% could be developed with more than one single family home based on the County’s urban zoning classification of Moderated Density Single Family. While the area was developed and platted at an urban density, it was not included in the CUGA established in 1994 even though the historic development pattern in the area meets the definition of urban growth established in CPP UGA-3.6. Utilizing Pierce County’s buildable lands methodology, this area would increase the urban growth capacity by 152
housing units. However, of the 152 housing units, 33 of the units are located within the Prairie Ridge subdivision that are currently vacant. This area was also identified as an area that should be included in the BLUGA by the Pierce County Regional Council during its consideration of Pierce County Ordinance 2013-59.

G. **Rhododendron/Wilderness Ridge**: This is an area located bounded by the 198th Avenue East corridor on the west, 214th Avenue East on the east, the City’s incorporated boundaries on the north, and the Tehaleh Employment Based Community on the south. The area includes approximately 1,859 acres of which 465 acres are currently part of the proposed Plateau 465 development at the southern end of the area. This area is located within the CUGA, but has not been officially identified official PAA for the City. In 2013, Pierce County adopted Ordinance 2013-59 approving the affiliation of the Rhododendron/Wilderness Ridge are to the BLUGA subject to the development of a Joint Planning Agreement (JPA). The area will not be considered an official PAA of the City until the adoption of the JPA.

H. **Falling Water/Creekridge**: This area is generally bounded by Rhodes Lake Road on the north, the ridge of the Bonney Lake Plateau on the west, and the Tehaleh Employment Based Community on the west and South containing approximately 840 acres. The area currently has a residential density of 1.55 housing units per acre. However, the Falling Water PUD, which will create 979 residential lots when completed, was vested prior to the adoption of the Growth Management Act and will be developed at an urban density within “rural” Pierce County. Utilizing Pierce County’s buildable lands methodology, this area would increase the urban growth capacity by 462 housing units.

I. **Tehaleh**: This area is the unaffiliated portion of the CUGA directly south of the Rhododendron/Wilderness Ridge area containing 5,103 acres. The Tehaleh Employment Based Community, a master planned community intended to provide a range of employment, residential, and recreational opportunities, encompass 4,719 acres within the PAA. The Tehaleh project is planned to be developed in three phases to accommodate 6,437 dwelling units with a population of approximately 18,088 and 3.9 million square feet of employment facilities.

If all of the areas above currently outside the CUGA were added to the BLUGA as PPA, the overall capacity of the urban growth area of Pierce County would be increased by 1,302 residential units and 216 jobs. Most of the additional capacity is associated with the Falling Water/Creekridge area and the West Lake Tapps area. During the process of working with Pierce County to add these areas to the BLUGA, the City would work with Pierce County to identify other areas within the CUGA that still retain a rural character that could be removed from the CUGA to ensure that there is not an overall increase in the capacity of the CUGA consistent with CPP-AT-2.3.2.

The City is currently working with Pierce County on the development of a JPA for the City’s three PAAs and the Rhododendron/Wilderness Ridge as required by CPP-UGA-4. The City expects to enter into JPAs for the other areas prior to the official expansion of the BLUGA by Pierce County.
Goal CD-1: To ensure the orderly development of the City's potential annexation area in a manner that ensures adequate and cost-effective provision of required urban services and facilities; ensures that development is built to City standards; reduces sprawl; implements the goals, objectives and policies of the Growth Management Act, Vision 2040's Multi-County Planning Policies, Pierce County Planning Policies, and the Bonney Lake Comprehensive Plan; and protects designated rural areas.

Policy CD-1.1: Review proposed annexations for their timeliness, the City's ability to provide them with urban services, and the costs and revenues that the City would likely incur. The City may refuse annexations in which public facilities are below the City's level of service standard.

Policy CD-1.2: The City shall actively pursue joint planning agreements with Pierce County to ensure that all development within Bonney Lake's PAA are built to mutually agreed upon standards. These agreements should cover a wide range of areas, including, but not limited to, development standards, collection of impact fees, annexations, urban service provision and land use, transportation, parks and capital facilities planning.

Policy CD-1.3: Consult affected citizens, cities, special purpose districts, and other parties prior to final approval of any annexation.

Policy CD-1.4 Ensure that additional capacity associated with expansion of the BLUGA maintains the current capacity of the Pierce County urban growth area through targeted reductions to the CUGA.

Community Development Element
5. PROJECTED GROWTH

RCW 36.70A.215 requires Pierce County and its cities to evaluate development (land consumption) over time to determine whether the adopted urban growth areas and zoning density provide land capacity sufficient to accommodate the adopted population projections. Bonney Lake is required to plan for the addition of 5,912 people, 2,104 housing units, and 943 jobs during the period from 2008 to 2030 pursuant to Pierce County Ordinance No. 2011-36s.

5.1 POPULATION GROWTH

The population growth assumed by Pierce County represents an annual growth rate of 1.5%, which is slightly lower than Bonney Lake’s historic growth rate of 2.1% as discussed in the Community Development Element – Section 3.1. Based on the 2.1% growth rate, Bonney Lake will likely to add 9,606 people and 3,363 housing units between 2008 and 2030 as compared to the 5,912 people and 2,014 housing units assigned by Pierce County. Between 2008 and 2014, the City has already added 2,300 people and 931 housing units: approximately 40% of the assigned targets has been reached in 25% of the planning period.

The assignment of the lower growth rate in 2011 was in part due to Bonney Lake’s classification as one of the “Smaller Cities” by Vision 2040’s Regional Growth Strategy adopted in 2009. Under the Regional Growth Strategy, the 46 “Smaller Cities” were required to accommodate 8% of the region’s population growth. However, in 2014, Bonney Lake was informed by PSRC that the Bonney Lake will be considered a Large City in future updates due to the City’s population growth. Under Regional Growth Strategy, the “Larger Cities” are required to accommodate 14% of the region’s population growth. Given that the City is now classified as a large city, the City is expected to handle a higher percentage of the region’s population growth within the City’s existing incorporated boundaries.

Based on this historic growth rate of 2.1% and classification of the Bonney Lake as one of the “Larger Cities”, the City should and needs to plan for higher population growth than currently assigned by Pierce County. Therefore, the City’s future plans shall be based on the need to accommodate an additional 10,134 people and 3,438 housing units between 2014 and 2035 within the existing incorporated boundaries of the City resulting in total population of 28,654 with approximately 10,197 housing units by 2035.

If Pierce County approves the City’s request to add the nine additional areas identified in Community Development Element – Section 4 to the BLUGA, the City’s 2035 population could be as high as 61,140 with 21,118 housing units, if all of the expansion areas, along with the three existing PAAs are annexed into the City.
5.2 EMPLOYMENT GROWTH

Bonney Lake is required to plan for an additional 1,141 jobs between 2008 and 2030 which equates to an approximately 1.1% growth rate. Between 2008 and 2012 Bonney Lake added 198 jobs to the City which equates to an approximately 0.9% growth rate. Therefore, it is expected that the City will add the jobs required under Pierce County Ordinance 2011-36s.

5.3 GROWTH CAPACITY

*Pierce County’s 2013 Buildable Lands Report* demonstrates that there is capacity to provide an additional 4,238 housing units and 3,151 jobs within the existing City limits. Therefore, the City has sufficient capacity within the existing incorporated limits to accommodate both the growth targets assigned by Pierce County and the statistical 2.1% growth rate adopted by the City.

![Figure 2-11: Bonney Lake Population and Employment Growth](image)

6. FUTURE LAND USE MAP

6.1 MAP OVERVIEW

The Future Land Use Map (FLUM) uses color-coded designations to express the intended use of land across the Bonney Lake area from 2015 to 2035: the twenty-year time planning horizon of the Comprehensive Plan. Preparation of the FLUM is explicitly required by the GMA.

In most cases, the designation on the FLUM matches the existing use of land as of 2014. In other cases, the designation may be different from what is on the ground today, indicating that the City expects the current use to change as Bonney Lake adds population and jobs. For example, a parcel that is in commercial use today but designated as “mixed use” on the map would be expected to redevelop with a mix of commercial and residential uses.
The FLUM is implemented through the City's zoning regulations. Each color-coded category on the FLUM has a corresponding set of compatible zoning districts. While the FLUM guides zoning, it is not the same as the Zoning Map. By definition, the FLUM is intended to be general and does not necessarily follow parcel boundaries. There are a total of 13 land use categories shown on the FLUM, including four residential categories, five commercial and mixed use categories, four open space categories, and one public facility category. Streets and public rights-of-way have the same designation as the adjacent property; however, the rights of way remain uncolored on the FLUM until the street or right-of-way is vacated.
Figure 2-12: Bonney Lake Future Land Use Map
6.3 Land Use Designations

- **Residential - Low Density**
  Primarily intended for single-family, detached residential development, but also may include a clustered single family units on properties that contain environmentally critical areas. This category is appropriate for planned public and semi-public uses designed to be compatible with residential uses, such as schools, religious institutions, and civic uses. Residential density in this category must be a minimum of 4 units per net acre up to a maximum of 5 units per net acre. The corresponding zoning classification is R-1.

- **Residential - Moderate Density**
  Intended for small-lot or cluster single family development, duplexes, and townhouse at a minimum density of 5 units per net acre up to a maximum density of nine units per net acre in order to provide for greater housing diversity and choice. Other compatible uses, such as schools, child care centers, parks, and religious facilities, may also locate in areas with this designation. The corresponding zoning classification is R-2.

- **Residential - High Density**
  This category is intended for a variety of high-density, residential land uses including townhomes, multipliers, and garden apartment/condo dwellings. Additional uses including institutional and civic uses live/ work, offices, and neighborhood scale retail stores (not including automotive oriented uses and free-standing pad sites) as part of mixed used developments. Such nonresidential uses are intended to provide services only to residents of the surrounding area and be placed in locations with a design character that blends into the neighborhood. Residential densities must be at least 10 units per net acre but may be higher as there is no adoptee maximum density. The corresponding zoning classification is R-3.

- **Public Facility**
  The Public Facility designation generally applies to non-open space parcels owned by public agencies or utilities. The designation includes City facilities, public schools, water and sanitary district facilities, transit agency facilities, utilities, and other federal, state, county, and local government facilities. The corresponding zoning classification is PF.

- **Commercial - Neighborhood**
  The general intent of this district to provide certain commercial and service uses which are compatible with neighborhoods. Typical uses include local services, retail, eating and drinking establishments, civic facilities, housing, and mixed-use development. The corresponding zoning classification is either C-1 or C-2.

- **Commercial - Mixed Use**
  This category is intended for a mix of high density residential land use, institutional, civic uses, offices, cultural activities, and retail and services, with protections against retail sales and services becoming dominant. Mixing of uses on the same site is encouraged. This zone is also intended to provide a degree of buffering between downtown and the surrounding single-family residential neighborhoods. The corresponding zoning classification is the Downtown Mixed.

- **Commercial - Downtown**
  The Downtown designation applies to the 128 acre area in the heart of Bonney Lake which is envisioned to become the civic center of the City. The designation also accommodates mid to high-rise residential projects and mixed use projects incorporating housing above non-residential uses. The corresponding zoning classification is the Downtown Core.

- **Commercial - Midtown**
  Midtown is envisioned to accommodate large-scale commercial uses serving a citywide or regional market. Retail uses within this category usually have large floor areas and high sales volumes and may be considered shopping "destinations" by consumers from Bonney Lake and other cities in East Pierce County. Uses such as furniture and electronic stores, auto dealerships, home improvement stores, department stores, and "big box" retailers are included. Residential uses are not permitted. The corresponding zoning classification is Midtown Core.

- **Commercial - East Town**
  The East Town district is intended to provide appropriately located areas for various land intensive and/or limited service commercial establishments, office uses, major retail stores and service establishments offering commodities and services required by residents of the city and its surrounding market area, wholesale distribution facilities, research and light industrial enterprises which are complementary to neighboring commercial and residential districts. Typical uses in this classification are the combination of major retail establishments and storage, distribution and assembly of products from previously prepared materials, including business and light industrial parks which do not generate excessive noise, odors, dust, smoke, heavy traffic congestion or pollution of water or air. The corresponding zoning classification is Eastown.

- **Open Space - Public**
  This category includes parks that are owned and operated by the City of Bonney Lake, including active and passive recreation areas and environmentally critical areas. Typical uses include athletic fields, playgrounds, and trails. The appropriate uses in any given park are based on the park's classification and standards and are further defined in the Public Facilities and Service Element. The category also includes lands owned by public or quasi-public agencies other than the City of Bonney Lake; including the Buckley-Bonney Lake Regional Park, the Tacoma Public Utilities transmission line rights of way, and property owned by the Cascade Water Alliance above the ordinary high-water mark. The corresponding zoning classification is RC-5.

- **Open Space - Private**
  The Private Open Space designation typically applies to private land set aside as open space within planned communities. Private open space uses may include natural areas, passive use areas, and outdoor recreation facilities, clubhouses, community amenities, such as playgrounds and picnic areas, and areas classified as environmentally critical areas located on private property. With the exception of ancillary structures related to the intended open space use, other types of development are not permitted in areas with this designation. The corresponding zoning classification is the adjacent residential zoning classification or N-1, N-2, R-3 or R-5.

- **Open Space - Conservancy**
  The Conservancy land use designation applies to private land with an open space character that is vacant or previously developed. Properties within this designation may be subject to constraints of soil instability, property access, water and flood levels, landslides, or slopes in excess of 30 percent that restrict the use of the property with structures. Allowable uses for this designation include public facilities, recreation facilities, quasi-public facilities, one single family home on a legally established lot, grazing, and small-scale cultivation. New residential development is allowed at a maximum density of one unit per five acres. Undeveloped portions of property within the Conservancy designation should be set aside for conservation purposes. The corresponding zoning classification is RC-5.
7. DEVELOPMENT PATTERNS

7.1 NEIGHBORHOODS AND CENTERS

Bonney Lake has been, is, and will remain primarily a residential community. These residential areas form the foundation of the community and are the physical and social expressions of community. The City is committed to preserving and strengthening these areas by protecting the existing housing stock; maintaining the physical quality of Bonney Lake’s neighborhoods; enhancing walkability; providing convenient access to shopping, services, open spaces, parks, civic facilities, and educational facilities. While the City will continue to strengthen the fabric of these residential areas, Bonney Lake must also accommodate additional growth to meet City’s mandatory growth targets. This will be accomplished by focusing new commercial development and higher density residential in the Downtown, within in other centers, and along major corridors.

Centers come in different shapes and sizes and are where residents and visitors shop, socialize, conduct business, and meet friends and neighbors. Some may be regional shopping centers that draw individuals and families from across east Pierce County. While others may be small neighborhood centers with a grocery store and restaurant or active recreational areas. Some may extend for many city blocks and others may consist of just a building or two. The common bond is that they provide focal points for Bonney Lake. Much of the Bonney Lake’s growth potential lies within these centers.

Especially, the Downtown which is centrally located to Bonney Lake residents, is the traditional community center, and is envisioned to become a designated Countywide Center with lively shopping streets, office buildings, residences, and public facilities.

Midtown is Bonney Lake’s commercial center of gravity. It is automobile-oriented but has potential for higher diversity and human-scale development in the areas that remain undeveloped, especially in those portions that will be served by side streets and frontage streets. Pedestrian facilities need to be provided in balance with the auto-centric nature of the uses in the area.

Eastown, located along SR-410 from 214th to 234th, is unique in its high proportion of undeveloped land and in its availability for light industrial as well as commercial development. It comprises a peninsula jutting into rural land, more distant from residential concentrations. Where deep-lot development is possible, such as in a large business campus, pedestrian orientation is achievable. Otherwise, Eastown is expected to remain highway-oriented.

“Develop Bonney Lake as a balanced community, maintaining and enhancing the existing single family residential ‘bedroom’ character with a thoughtful blending of desired economic activities and higher density residences.”

Comprehensive Plan
The City of Bonney Lake
October 23, 1985
Lake Tapps is primarily a recreational and residential center located on the shores of Lake Tapps and includes Allan Yorke Park, the Senior Center, Public Works Center, the Bonney Lake Boat Launch and a number of higher density residential developments. These area has the potential to support some limited commercial uses that would support the surrounding residential and recreational uses.
Corridors have traditionally been associated with transportation functions – carrying vehicles from freeways to homes and businesses in the City. Over the years, this function has influenced land use, to the point that many corridors have become centers themselves. Some Bonney Lake corridors are lined with shopping, services, offices, and community institutions. The pattern largely favors automobiles over pedestrians and other modes, and is part of Bonney Lake’s legacy as an auto-centric City. Looking to the future, some of the City’s corridors will be reshaped to reflect contemporary planning and development practices. Activity will be focused around nodes rather than continuing the current linear commercial pattern, creating denser, pedestrian-oriented places at key locations.

The elements of the build environment like high quality walkable neighborhoods, well designed centers and multimodal corridors facilitate formal and informal social interactions between the residents of Bonney Lake which is crucial to building social capital: the by-product of social relationships created by reciprocal exchanges during the social interaction of members of a community. This social capital is the glue that binds residents to Bonney Lake; fosters civic engagement and volunteerism; and constitutes one of the defining elements in creating a community. Social capital has positive association on the health of individuals within a community as people with more social capital, “... appear to have lower mortality rates and are less likely to report being in ‘fair’ or ‘poor’ health.”

Another important part of strengthening the City’s identity is protecting the tree hillsides; the overall tree canopy; Lake Tapps; Fennel Creek; and views of Mount Rainier, the Cascades Mountains, and the Olympic Mountains through a continued commitment to open space preservation and conservation of natural resources.

**Goal CD-2:** Bonney Lake provides healthy, livable, well maintained, walkable, and safe residential neighborhoods; along with dynamic and vibrant centers accommodating housing, shopping, services, civic activities, and entertainment facilities developed in a manner that harmonious blends the natural and built environments.

*Policy CD-2.1:* Create a positive regional identity for Bonney Lake as a City with outstanding neighborhoods and vibrant centers, which provide gathering places for residents and visitors.

*Policy CD-2.2:* Development of Bonney Lake’s under-developed or vacant sites must balance desire to provide an array of housing; jobs; and retail, recreational, and entertainment facilities with the need to respects the scale and form of surrounding properties and neighborhoods.

*Policy CD-2.3:* Conserve and protect the unique ecological characteristics of the Bonney Lake and utilize urban forestry to integrate open space, parks, green belts, street trees, landscaping, and natural features into future development to maintain the Bonney Lake’s livability, improve access to nature, and to address climate change by utilizing trees to sequester carbon from the atmosphere.

*Policy CD-2.4:* Planning and land use decisions should recognize residential neighborhoods as the basic “building blocks” of the community, ensure compatibility with surrounding single family homes, protect...
neighborhoods from incompatible uses, and maintain a range of single family residential zones corresponding to the prevailing neighborhood densities.

Policy CD-2.5: Allow home occupations in Bonney Lake residences provided that impacts are mitigated and that the business do not alter residential character of the neighborhood.

Policy CD-2.6: Allow schools, day care centers, senior centers, group homes, public and semi-public facilities (e.g., churches), and nursing care facilities in residential areas, subject to conditions which limit the impacts of these uses on nearby properties. To the extent permitted by state and federal law, conditions of approval may be placed on such uses to ensure that they are operated in a manner that is sensitive to neighborhood concerns, and that maintains the quality of life. In addition, such uses should be sited in a way that minimizes the exposure of future occupants to noise, localized air pollution sources, and other environmental hazards.

Policy CD-2.7: Provide healthy and safe neighborhoods free of nuisances, environmental hazards, and visual blight (e.g. excessive noise, poor air quality, light pollution, illegal dumping, illegal signage, graffiti, littering, etc.) that disrupt and impact Bonney Lake resident’s quality of life.

Policy CD-2.8: Develop the Downtown as Bonney Lake’s center with the highest level of land use diversity, architectural interest, pedestrian orientation, and human-scale design. New buildings should have their facades at the sidewalk edge except in certain cases along SR 410, as shown in the Downtown Plan.

Policy CD-2.9: Develop the Midtown as a mixed use district with the highest possible level of architectural interest, pedestrian orientation, and human-scale design consistent with the fact that 1) much of it is already built and 2) pedestrian traffic alongside and across the highway will suffer due to high vehicular traffic. Wherever possible, developments should reach deeply into the adjoining commercial land, provide local access streets as dictated by the Mobility Element, and place their building facades at the edge of the sidewalk adjoining said local access streets.

Policy CD-2.10: Develop the Eastown district (from 214th to 234th) with 1) architectural detail suitable for automobile orientation along SR 410, 2) internal and if possible external pedestrian connections, and 3) preference for business park or campus-scale development. Wherever possible, developments should reach deeply into the adjoining commercial/industrial land, providing pedestrian-friendly local access streets in locations dictated by the Mobility Element.

“The centers concept is at the core of VISION 2040. While centers in Metropolitan and Core Cities serve key regional functions as major job, commercial, transportation, and government hubs, other types of centers are also important. VISION 2040 expects each city in the region to take steps to further evolve one or more central places as mixed use areas of residences, employment, shops, cultural facilities, and entertainment. Each such center — no matter how large or small — should serve as a focal point of community, be walkable, and have easy access to transit.”

VISION 2040
December 2009
Policy CD-2.11: Develop key “multi-modal” corridors that accommodate multiple modes of transportation that connect Bonney Lake’s neighborhoods and centers, enhance the City’s civic identity, encourage transit use, reduce vehicle miles traveled, provide comfortable walking and bicycling environments, and project a positive image of the city.

Policy CD-2.12: Utilize capital improvement projects, design guidelines, and land use decisions to improve the walkability of neighborhoods, enhance the ability to travel by bicycle or public transportation, and minimize the distance a resident must travel to reach basic services, shopping, parks, schools, and other civic amenities.

Policy CD-2.13: Local centers take a variety of forms; some may be characterized by predominantly retail uses, while others may contain a more varied mix of activities including commercial, office, residential, parks, community centers, other civic facilities, and education facilities. Bonney Lake will maintain a variety of centers within the City that meet a range of neighborhood, citywide, and regional needs based on the following hierarchy:

- **Downtown** which will accommodate pedestrian-oriented retail uses, uses that serve residents and employees, and specialty and “niche” activities such as entertainment and outdoor dining.

- **Town Centers** which will accommodate uses serving several neighborhoods, such as local serving offices, restaurants, large regional grocery stores, specialty retail stores, and regional shopping centers. Regional shopping centers main attractions are its anchors which include traditional, mass merchant department or fashion specialty stores. Town Centers include the Midtown and Eastown subareas.

- **Neighborhood Centers** which corresponding to smaller shopping centers and local-serving retail and service uses along major thoroughfares. Neighborhood Centers typically include a grocery or drug store, or other moderately sized anchor. New large-footprint retail uses are inappropriate in such areas. Neighborhood Centers include the Lake Tapps subarea.

Policy CD-2.14: Encourage the development of mixed-use; senior housing; high density residential; and public services such as education, health care, libraries, child care, governmental facilities in the centers to create vibrant activity nodes, provide housing choices, advance sustainable development principles, support transit, and preserve the City’s residential neighborhoods.

Policy CD-2.15: Support the transformation of auto-oriented shopping centers—currently characterized by retail strips surrounded by large surface parking lots—into more pedestrian-oriented centers to generate foot traffic, create a stronger sense of place, and bring life to outdoor spaces.

Policy CD-2.16: Encourage the use of shared parking in commercial districts, rather than independent parking lots on each commercial property to reduce the total land area dedicated to parking and create a more pedestrian-friendly environment.
Increased housing options and types will help the overall housing supply, maintain community stability, provide housing choices that are affordable to all economic segments Bonney Lake’s population, and serve people in different stages of life. Bonney Lake’s zoning and development regulations are intended to allow development of housing that will satisfy varied consumer preferences.

Perhaps the most complex of these issues is providing housing opportunities that are affordable for all economic segments of the community. When speaking of “housing affordability,” the standard used by lending institutions, the real estate industry, and governmental agencies is that no more than 30% of a household’s gross monthly income goes toward housing expenses, regardless of income level. For ownership housing, this percentage typically includes taxes, insurance and other related housing expenses. For rental housing, a utility allowance is included in the 30% figure.

A household in which housing costs exceed 30% of gross monthly income is considered to be “cost burdened”; if costs exceed 50% of gross monthly income, the household is severely cost burdened. “Affordable housing” typically refers to housing that is affordable to households earning 80% or less of the Pierce County Median Income. Households earning 80% or less of the median income are also referred to as “Low-income” households.

Those earning 50% or less are referred to as “very low-income” households, and those earning 30% or less are also known as “extremely low-income” households.

Using the definition of “housing affordability” together with the 2012 Pierce County Median income of $59,150; Table 2-3 represents the amount of money that Bonney Lake households earning the median income or less can afford to pay for rental and ownership housing:
A quarter of Bonney Lake households are considered low-income: 12% of the households have an income of less than $25,000 and 13% of the households that have an income between $25,000 and $50,000.

**Housing Affordability**

The following table, derived from the percentages provided in the 2008 – 2012 American Community Survey data tables for Bonney Lake, then applied to the City's 2014 housing unit total provided by the Office of Financial Management. The table provides some valuable information related to the affordability of rentals in the City, but can easily result in erroneous assumptions. For instance, it makes it appear that there are enough rentals for households making 31% - 80% of median income. However, of the 273 units cited as affordable to those households making 31% to 80% of the median income, households making less than 30% of the median income rent a percentage of the units reducing the overall number of units affordable to the group making 31% to 80% of the median income.

Table 2-6: Home Ownership Affordability

It appears that the market is providing sufficient affordable rentals and single-family homes to households making 80% or more of the median income and the City has a lack of housing that is affordable to households making less than 80% of the median income.

This analysis looks at the traditional methodology for determining affordability: housing cost is no more than 30% of income. However, this benchmark ignores transportation costs, which are typically a household’s second largest expenditure. By utilizing Housing + Transportation Index (H+T Index) developed by the Center for Neighborhoods Technology and the U.S. Department of Housing and Urban Development an expanded view of affordability is available, buy combining housing and transportation costs to measure affordability. The methodology sets the benchmark at no more than 45% of household income. The H+T Affordability Index Map illustrates that all of the households in Bonney Lake spend more than 45% of their household income on housing and transportation.

One of the challenges on relying on the H+T Affordability Index Map to determined affordability is that the one of the highest cost variable in determining transportation cost is based on solely on personal vehicle preferences (e.g. year, make, and model). These cost increase the overall transportation cost and are unrelated to City or regional housing policy or the geographical location of the City. Additionally, the lack of a robust and efficient mass transit system also increase the cost of transportation by reducing travel options: development of the mass transit system is outside of the City’s regulatory control. Therefore, the City will base housing affordability on the traditional methodology which is based on housing cost and income. Given the adopted methodology the City needs to develop housing strategy to provide housing that is affordable in low-incomes households.

**Lifecycle Housing**

While affordability is one key factor in defining the housing needs of a community, household size, composition, and age of household members should also be consider in determine the housing needs of a community to ensure that there is a housing for the various life stages: a concept called “lifecycle housing.”
Special Needs Housing

In addition to housing affordability, the City needs to ensure that there is sufficient housing opportunities for citizens with special needs which include those people who require some assistance in their day-to-day living, such as the mentally ill, people with developmental or physical disabilities, substance abusers, youth at risk, veterans and the frail elderly. Family living situations, institutional settings, social service programs and assisted housing all serve a portion of those with special needs.

Goal CD-3:  Provide a variety of housing options that will meet the needs of all Bonney Lake residents and is affordable to all economic segments of Bonney Lake.

Policy CD-3.1: Encourage the development of a diverse housing stock that provides a range of housing types (including family and larger-sized units) throughout the community to accommodate the diverse needs of Bonney Lake residents through changes in age, family size, and various life changes.

Policy CD-3.2: Encourage the development of special-needs housing, especially for seniors, such as independent living, various degrees of assisted living and skilled nursing care facilities.

Policy CD-3.3: Actively promote community awareness and education campaigns regarding affordable housing in order to engender acceptance throughout the community.

Policy CD-3.4: Explore methods and partnerships to reduce the cost associated with developing housing in Bonney Lake.

Policy CD-3.5: Ensure that there is a sufficient supply of housing affordable to all income levels by maintaining supply of housing that is currently affordable median-income, low income and very low-income households and working to increase the supply of housing that is affordable to extremely low-income, very-low income, and low income households within Bonney Lake.

Policy CD-3.6: Actively participate in regional responses to housing needs and issues.

7.3 OPEN SPACE

Preservation of an open space around Bonney Lake, complemented by local parks and natural areas has been critical component of the City comprehensive plan since 1964. The City has consistently worked to protect the City's natural resources, provide opportunities for recreation, enhance visual beauty, and shape the Bonney Lake's character. Open space is the third largest land use in the city limits, encompassing over 518 acres. It provides structure to the City, space for recreation, and a means of protecting important natural resources.

“Green belts and parks are an important land element within the plan for Bonney Lake, since one of the primary purposes of a municipality is to offer maximum recreation facilities in a suburban setting. The green belts may be any open space such as watersheds, farms, forest and parks.”

Plan for Bonney Lake, Washington
May 2, 1964
Access to open green spaces can have salutary effect on mental health and well-being including an increased sense of wellbeing, higher levels of self-reported peace and quiet, greater satisfaction with home and neighborhood, and reduced levels of stress.27

Policies for parks, private open space, and other open spaces in Bonney Lake reflect the City's commitment to enhancing the City's character, meeting the recreational needs of its residents, improving the health of the community, and protecting the natural environment. These policies are supplemented by those in the Public Services and Facilities Element.

Goal CD-4: Preserve open space, parks, greenbelts, and natural areas, which together protect the Bonney Lake’s natural resources, provide opportunities for recreation, enhance visual beauty, and shape Bonney Lake’s character

Policy CD-4.1: Maintain development regulations which distinguish between different types of open space, in recognition of the different types of activities that take place on undeveloped land.

Policy CD-4.2: Maintain and enhance a network of neighborhood, community, and linear parks. Parks should be recognized as fundamental to Bonney Lake’s quality of life, and should be carefully managed to create a balance between passive and active open space.

Policy CD-4.3: Utilize open space, including parks, greenbelts, easements, and other open areas to connect the City, provide car-free corridors for pedestrians and bicyclists, and tie together Bonney Lake’s neighborhoods, centers, and employment districts.

Policy CD-4.4: Encourage private-public partnership to create on-site open space for public enjoyment in mixed-use areas and commercial areas

Policy CD-4.5: Allow community gardening and “urban” agriculture in a residentially zoned areas and open spaces provide that that uses do not impact the function and values of environmentally critical areas.

Policy CD-4.6: Allow recreational uses on lands designated as environmentally critical areas provide that that uses do not impact the function and values of environmentally critical areas.

Policy CD-4.7: Establish zoning standards to mitigate the presence of infrastructure facilities such as radio and telecommunication towers within designated open space areas.

Policy CD-4.8: Prevent the encroachment of development or conversion of common open space areas within planned developments or other residential projects. Shared open space areas in residential subdivisions shall be permanently restricted to open space uses through deed restrictions or other appropriate means.

Policy CD-4.9: Advocate for open space conservation and resource protection in the unincorporated areas east of the Bonney Lake’s city limits but within the City’s sphere of influence. These areas should remain in agricultural and open space uses for the lifetime of this Comprehensive Plan.
7.4公共空间

最熟悉的公共空间包括公园、学校和公共建筑，但也可以更广泛地应用于整个公共“领域”，包括街道、人行道、路缘、种植带以及旅行时所经历的所有公共空间。

以下政策旨在创造整个城市的难忘公共空间。对于城市公园和公共建筑，这意味着创建邻里和中心的焦点。公共开放空间如公园和广场可以帮助加强市政身份，并提供重要的社区聚集地。

公共建筑如学校、消防站、活动中心和市政办公室同样应该展示出典范设计。

最基本的基础设施机会涉及现有的街道和高速公路。该市已经投资数百万美元进行街道景观改进，包括路灯、地下公用事业、景观、街树、灌溉系统、标志牌和街头家具，以提高街道的视觉质量，并使其更安全、更具吸引力。街道空间的设计特别重要，旨在实现城市的更行人友好。

目标CD-5：提供街道、人行道、公园、广场、市政建筑和其它公共空间，使波尼湖的场所感和视觉质量得到提升。

政策CD-5.1：认识到街道作为公共空间的重要性：景观美化、照明、街道景观元素、路面变化、标志牌改善、横幅和其它公共领域改善措施可以在不降低其功能容量的情况下增强其体验。

政策CD-5.2：廊道的改善应适合每条街道的规模和特性，反映其交通量和预期功能。

政策CD-5.3：设计指导原则、评审要求、工程标准和资本改进项目应旨在改善街道空间的视觉质量。

政策CD-5.4：使用街头家具（例如长椅、垃圾桶、摊位、自行车架、候车亭等）来改善行人体验，增强标识和视觉连贯性，并为某一区域的期望性格增色。

政策CD-5.5：鼓励新开发项目内公共聚集空间的发展，与项目的规模和预期活动水平相适应，并尊重周围土地用途。

政策CD-5.6：鼓励广场、口袋公园和类似空间以刺激行人活动，提供社区聚集地，并与毗邻建筑的总体外观相协调。

政策CD-5.7：虽然每个公共空间的设计都应对其背景保持敏感，但所有公共空间都应具有一些共同的设计特征。这些包括：

- 位于显眼、可识别和可访问的地点，它们可能经常使用并高度可见。
- 坐位区、标志牌、行人便利设施、活动区域及其他增加实用性和功能性的设计元素。

- 在促进行人活动的地方，创造更强的标识和视觉连接，并为该区域的期望性格增色。

- 虽然每个公共空间的设计都应对其背景保持敏感，但所有公共空间都应具有一些共同的设计特征。这些包括：

- 位于显眼、可识别和可访问的地点，它们可能经常使用并高度可见。

- 坐位区、标志牌、行人便利设施、活动区域及其他增加实用性和功能性的设计元素。
• A unique identity that enables the space to function independently, while still allowing the space to work in connection with adjacent development.

• Accommodation of a variety of users (i.e. arts, cultural, recreational, different ages, abilities, etc.).

• Variations in landscaping, pavement, lighting, public art, and other amenities which improve the quality of each space and define its character.

• Protection from wind, sun and noise exposure.

• Spaces which utilize a mixture of direct sunlight and shade.

7.5 SCENIC RESOURCES

In addition to the buildings, landscapes, and public spaces Bonney Lake's character is shaped by its natural setting including beautiful lakes, wooded hillsides, the Fennel Creek Corridor, and views of Mount Rainier, the Cascade Mountains, and the Olympic Mountains. As Bonney Lake continues to grow, a key challenge will be balancing new development with preservation of the natural resources that give the area much of its character.

Top community priorities include:

• preserving the lakes and views of Mount Rainier;

• preserving large tracts of woodland and open space for public enjoyment;

• additional landscaping at gateways and along key corridors; and

• preserving vegetation in new development to the greatest extent possible and where not possible re-vegetating developed areas.

While City programs and requirements such as open space preservation and environmental critical area regulations protect protecting natural settings, additional comprehensive strategies are needed to protect scenic resources and preserve the “scenic routes” illustrated on Figure 2-16 throughout the City.

Goal CD-6: Protect and enhance Bonney Lake's scenic, natural, and visual character.

Policy CC-6.1: Preserve views through sensitive site design, especially along scenic corridors. Prevent new development from blocking important public views.

Policy CD-6.2: Maintain a network of designated scenic routes through Bonney Lake. A particular road or corridor may be considered scenic by virtue of its design or amenities, the terrain and natural features it traverses, or the views and visual importance it commands. The designation expresses intent to maintain or improve visual features which contribute to scenic designations through land use, transportation, and capital improvement decisions, as well as landscaping, operations, and maintenance activities along these corridors, but does not necessarily limit abutting uses.

Policy CD-6.3: Acquire lands or view easements if necessary to preserve important public views.
Policy CD-6.4: Encourage developers to retain mature trees to the extent possible, particularly in residential areas.

Policy CD-6.5: Reduce the visual impacts of utility lines and poles along corridors by continuing to underground overhead lines within existing development, and by requiring underground utilities in new development

Policy CD-6.6: On the south side of SR 410 near the west city limits, tree-cutting shall not extend so far from SR 410 as to remove the solid backdrop of mature trees as viewed horizontally from SR 410.

7.6 GATEWAYS

First impressions are important to a positive community character. "Gateways" are key locations throughout the community where these impressions can best be established and reinforced. Gateways provide a focal point and a visual "announcement" of the City of Bonney Lake by communicating the unique character and identity of Bonney Lake and visually distinguishing its neighbors. There are three types of gateways: Primary Gateways, Secondary Gate Ways, and Neighborhood/District Gateways

Primary Gateways are focal points typically located around highway intersections / interchanges, major entrances to Bonney Lake. These gateways are the highest priority for improvements. Currently there are two primary gateways located on SR-410 on the east and west sides of the City. Private development around these areas should create a distinctive image and be held to the highest design and aesthetic standards. Aesthetic improvements in these areas should incorporate elements that enhance the community image with:

- features that are distinctive and recognizable;
- enhanced landscaping in the public right-of-way and on private property; and
- public streetscape and aesthetic elements such as decorative street lighting, public art, unique signage and decorative paving.

Similar to Primary Gateways, Secondary Gateway areas serve as focal points around major street intersections and entrances into Bonney Lake. These areas should project a positive community image, and private development around these areas should be held to the highest design and aesthetic standards which create a distinctive image for Bonney Lake.

Aesthetic improvements in these areas should:

- reinforce the community’s unique character through compatible streetscape enhancements, monuments and public art;
- be distinctive and recognizable when approaching from a distance; and
- have enhanced public streetscape improvements and enhanced landscape design on private property.
Finally Neighborhood/District Gateways highlight particular neighborhoods and business districts typically located at major entrances that help announce a development and transition from the public setting of major corridors to the more private setting of a neighborhood or business district. Unlike Primary and Secondary gateways, these improvements are largely the responsibility of private property owners.

Amenities include well-designed entry monuments, private art, unique landscaping and other elements that further establish Bonney Lake’s character while announcing the neighborhood or development. Although not a primary focus, public infrastructure in these areas is expected to meet enhanced standards for appearance and general maintenance.

**Goal CD-7: Improve gateways into Bonney Lake and into its individual neighborhoods and districts to achieve a sense of transition and arrival.**

*Policy CD-7.1: Develop a Gateway Plan which provides guidance for the design and appearance of primary and secondary gateways into Bonney Lake.*

*Policy CD-7.2: Private development located within gateway areas should incorporate public improvements that enhance the identity and image of the City*

*Policy CD-7.3: Require new development projects to provide gateway features if their location and context warrant such inclusion.*
7.7 GUIDING DEVELOPMENT

Growth must be carefully managed to maintain and enhance Bonney Lake's high quality of life; to ensure that new development makes a positive contribution to the City; to create an attractive, livable, and walkable community; promote public health; and to protect the elements of community life valued by Bonney Lake’s residents.

Bonney Lake’s development regulations are particularly important as those regulations implement the comprehensive plan at the parcel level and establishes detailed standards and parameters for the use of property. State law requires the City’s development regulations to be consistent with the City’s comprehensive.

Development regulations address the subdivision of land, the improvement of infrastructure and public facilities to keep pace with growth; promote high quality development; address the relationship of buildings with the surrounding neighborhood context; ensure that development is safe, aesthetically pleasing, and harmonious with its setting; supports the goals of the community; and the ways Bonney Lake will carry out its commitment to be a sustainable suburban community. The objective is to create great places of lasting value.

Goal CD-7: Guide growth and development to ensure that it is orderly and efficient; leverages public investment to address the needs of the underserved areas; ensures the continued availability of infrastructure and public services; reduces adverse impacts on adjacent properties; and protects the natural environment.

Policy CD-7.1: Ensure that land use decisions consider the characteristics of the transportation network, including road capacity, the quality of the streetscape, and the availability of public transportation and other modes of travel.

Policy CD-7.2: Use development regulations to direct growth, ensure sufficient opportunities for new development, improve Bonney Lake's quality of life, preserve existing neighborhoods, reduce nuisances, achieve compatibility between adjacent properties and uses, address land use conflicts, and protect the health and safety of residents, visitors, and workers.

Policy CD-7.3: Utilize urban design guidelines to guide and evaluate remodeling projects, additions, and new construction. Guidelines should:

- Address building height, scale, massing, materials, colors, and detailing;
- Ensure pedestrian connections;
- Encourage interesting features such as varied roof forms, canopies, balconies, window displays, bay windows, vertically and horizontally modulated wall surfaces, trellises with native vines, porches, artwork, planting beds, ornamental trim, modulations and varied textures, colors, and materials; and
- Ensure that sites are designed in context and relationship to surrounding uses and landscapes.
Policy CD-7.4: Recognize certain areas as having natural constraints which preclude safe or environmentally sound development. These constraints are discussed in the Environmental Conservation Element.

Policy CD-7.5: Allow new development to occur only when the public facilities needed to serve that development are available or will be provided by the development through the payment of impact fees, in-lieu fees, connection charge; construction of the facility as part of the development; or other mitigation measures.

Policy CD-7.6: Although the Comprehensive Plan provides development capacity accommodate growth until 2035, steps should be taken to retain some of this capacity for the post-2035 period and guide development to the Downtown, Town Centers, and Neighborhood Centers.

Policy CD-6.7: Avoid the creation of “problem” parcels that are not practical to develop or provide with services. Work to eliminate or merge such parcels where they already exist. A problem parcel is defined as:

- Any parcel which, regardless of the minimum area or dimension requirements set forth in the Zoning Ordinance, is not practically developable because of its unusual dimensions, shape, or location relative to other parcels; or
- Any parcel which has other land use constraints, such as environmentally critical areas; or
- Any parcel with no street access or insufficient street frontage to provide access.

Policy CD-7.8: Encourage partnerships between the City and the private sector to undertake joint public-private development.

Policy CD-7.9: Integrate new large-scale development projects into the fabric of the existing community rather than allowing such projects to be self-contained, walled off or physically divided from surrounding uses. New development should be viewed as an opportunity to improve connectivity between neighborhoods. To the extent feasible, circulation systems and open spaces in such developments should tie into existing streets and open spaces on the perimeter. In addition, existing development should be retrofitted over time to reduce unnecessary walls and barriers and improve pedestrian connections between neighborhoods.

8. PROPERTY RIGHTS

The Fifth Amendment to the United States Constitution provides that private property shall not be taken for public use without just compensation. Article 1, section 16 of the Washington State Constitution provides that “[n]o private property shall be taken except for public purposes within its constitutional authority and only upon payment of just compensation.”

To help local jurisdictions avoid violating property rights, in the State published the State of Washington, Attorney General’s Recommended Process for Evaluation of Proposed Regulatory or Administrative actions to Avoid Unconstitutional Takings of Private Property.” In it, the Attorney General states, “Government
has the authority and responsibility to protect the public health, safety, and welfare. This is an inherent attribute of sovereignty. Pursuant to this authority, the government may properly regulate or limit the use of property. Accordingly, government may abate public nuisances, terminate illegal activity, and establish building codes, safety standards, or sanitary requirements. The government may limit the use of property through land use planning, zoning ordinances, setback requirements, and environmental regulations.

“The government may also establish conditions or requirements for potential uses of property which may have adverse impacts. Conditions may include the granting of easements or donation of property for public use.

“Most comprehensive land use regulation does not, in itself, constitute a taking of property. Zoning and other comprehensive regulations are a legitimate exercise of the government’s police power. The regulation, however, must advance a legitimate public interest and not deprive the owner of all economic or beneficial use of the property. Also, a regulation which destroys a fundamental property right, such as the right to possess, exclude others from, or dispose of property, could, on its face, constitute a taking.”

**Goal CD-8: Protect the property rights of landowners from arbitrary and discriminatory actions.**

*Policy CD-8.1: Balance the responsibility to protect the community from the impacts associated with new residential and commercial development with the responsibility to protect property rights.*

*Policy CD-8.2: Build into the regulatory scheme procedures for avoiding takings, such as variances or exemptions.*

*Policy CD-8.3: Continue to work to streamline the permitting process utilizing LEAN principals in order to efficiently process permit applications.*

<th>Comment</th>
<th>City Response</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tacoma Pierce County Public Health Department (TPCHD)</td>
<td>1</td>
<td>Section 2: Vision</td>
<td>The structure of “family” is undergoing rapid changes. To proactively respond to this change, some cities have trended away from the term “single family” to “single detached”. Instead, they focus on the built form and rename those homes or neighborhoods as “single detached dwellings” or “single detached neighborhoods”.</td>
<td>While the City’s vision statement has been modified, the Planning Commission has recommend that the City continue to use the terms “single family” and “multi-family”.</td>
</tr>
<tr>
<td>TPCHD</td>
<td>2</td>
<td>Section 2: Vision</td>
<td>If you prefer to go ahead with this proactive change, please make sure that these terms are changed throughout the whole comp plan update. (Particularly in Section 3.3, etc...)</td>
<td>Please the response to TPCHD comment #1.</td>
</tr>
<tr>
<td>TPCHD</td>
<td>3</td>
<td>Section 3.1: Demographics</td>
<td>TPCHD supports the direction of moving away from “auto-centric” Bonney Lake to “walkable communities” to incorporate physical activity into the daily lives of those living in your community.</td>
<td>Noted</td>
</tr>
<tr>
<td>TPCHD</td>
<td>4</td>
<td>Section 3.2: Land Use</td>
<td>Should you accept the change of “single-family homes” to single-detached dwellings”, you can make the corresponding change from “multi-family homes” to “multi-attached dwellings”.</td>
<td>Please the response to TPCHD comment #1.</td>
</tr>
<tr>
<td>TPCHD</td>
<td>5</td>
<td>Section 4: Potential Annexation Areas</td>
<td>From public health point of view, we are very cautious about balancing growth and annexation. Research evidence tells us that urban sprawl is not good for our health. Please refer to TPCHD’s Healthy Community Planning Toolbox’s Research Evidence Linking Physical Activity Intervention to Health Outcome (<a href="http://www.tpchd.org/files/library/e8c03f19873c6a2a.pdf">www.tpchd.org/files/library/e8c03f19873c6a2a.pdf</a>).</td>
<td>The City has added language that demonstrates that the areas targeted for the expansion of the BLUGA are characterized by urban growth and do not have a rural character. These expansion would not further urban sprawl, but recognize the current development pattern around the City. A policy was also added to work with the County to reduce areas of the CUGA that are still rural in character to offset the expansion of the BLUGA.</td>
</tr>
<tr>

<td>---</td>
<td>--------------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------</td>
<td>-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>TPCHD</td>
<td>6</td>
<td>Section 4: Potential Annexation Areas</td>
<td>TPCHD strongly encourages land-use intensification within existing urban areas prior to annexation, in order to minimize urban sprawl and maximize existing urban services/infrastructure.</td>
<td>Noted. See Above.</td>
</tr>
<tr>
<td>TPCHD</td>
<td>7</td>
<td>Section 4: Potential Annexation Areas</td>
<td>Should annexation be absolutely needed, please strengthen policies around concurrency to ensure on-time delivery of urban services and facilities to support new development.</td>
<td>Additional policies will be located in the Public Service and Facilities Element.</td>
</tr>
<tr>
<td>TPCHD</td>
<td>8</td>
<td>Section 7.1: Neighborhoods and Centers</td>
<td>TPCHD welcomes the creation of centers or designations throughout the City where residents and workers can meet neighbors, conduct businesses, and have close proximity to services. The kind of compact human-scale, both transit- and pedestrian-oriented developments which you envision for Mid-Town is the way to go! Certainly walkable streets and linear urban parks can still be created in large industrial parks in East-Town. Workers in business parks would like to be given the choice to safely walk to public space, open space and amenities during their work day for personal services. Building centers allowing residents and workers to walk or bike to can encourage physical activity and improve health.</td>
<td></td>
</tr>
<tr>
<td>--------</td>
<td>---</td>
<td>----------------------------------------</td>
<td>--------------------------------------------------------------------------------------------------</td>
<td></td>
</tr>
<tr>
<td>TPCHD</td>
<td>9</td>
<td>Section 7.1: Neighborhoods and Centers</td>
<td>Policy CD-2.8—To complement buildings with facades at the sidewalk edge, encourage the provision of on-site open space or urban plazas along sidewalks to create public realm for people to relax and congregate. These pockets of open space may seem to interrupt the continuous building façade, but can form a network of open space along well-design sidewalks adorned with street furniture and landscaping. Small urban parks and plazas can become part of the wider linear park system.</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Noted. The City has added language regarding the relationship between centers and neighborhoods and community health.</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>This is addressed in Policy CD-2.15</td>
<td></td>
</tr>
<tr>
<td>TPCHD</td>
<td>10</td>
<td>Section 7.1: Neighborhoods and Centers</td>
<td>Policy CD-2.13—Encourage &quot;grocery stores&quot; in all centers, particularly small neighborhood centers, to provide easy access to healthy foods (<a href="http://www.tpchd.org/files/library/03aaaee462dffb36.pdf">www.tpchd.org/files/library/03aaaee462dffb36.pdf</a>). Grocery stores are specifically identified as key components in neighborhood and town centers. In the Downtown, services that are needed to support resident is identified as a key component, which includes grocery stores. Please note that there is not current not a problem with food access in Bonney Lake. According the USDA Food Access Atlas (<a href="http://www.ers.usda.gov/data-products/food-access-research-atlas/go-to-the-atlas.aspx">http://www.ers.usda.gov/data-products/food-access-research-atlas/go-to-the-atlas.aspx</a>) there are no Food Deserts in the City of Bonney Lake.</td>
<td></td>
</tr>
<tr>
<td>TPCHD</td>
<td>11</td>
<td>Section 7.2: Housing</td>
<td>TPCHD is encouraged to see policy CD3.2 that provides options for seniors to age in place. Also consider housing choices that fit the lifestyles of the millennial in order to allow the younger generation to stay in Bonney Lake, if they so desire. Policy CD-3.1 specifically encourages the development of diverse housing types, &quot;... to accommodate the diverse needs of Bonney Lake residents through changes in age, family size, and various life changes.&quot;</td>
<td></td>
</tr>
<tr>
<td>TPCHD</td>
<td>12</td>
<td>Section 7.2: Housing</td>
<td>Policy CD-3.6 requires some clarification. Do you mean &quot;Proactively respond to region-wide housing needs and trends&quot;? The current language is correct the policy is to participate existing and proposed regional responses housing issues</td>
<td></td>
</tr>
<tr>
<td>TPCHD</td>
<td>13</td>
<td>Section 7.3: Open Space</td>
<td>Policy CD-4.2--TPCHD encourages the provision of local parks or smaller pocket parks within reasonable walking distance (about ½ to ¾ mile from home) throughout the City to provide many physical, social and mental health benefits. Noted. The standards for parks will be addressed in the City’s Public Facilities and Services Element.</td>
<td></td>
</tr>
<tr>
<td>TPCHD</td>
<td>14</td>
<td>Section 7.3: Open Space</td>
<td>Consider the use of inter-local agreements to provide public access to school playgrounds and other community space. This may be considered during the development of the Implementation Chapter.</td>
<td></td>
</tr>
<tr>
<td>TPCHD</td>
<td>Section</td>
<td>Policy</td>
<td>Response</td>
<td></td>
</tr>
<tr>
<td>-------</td>
<td>---------</td>
<td>--------</td>
<td>----------</td>
<td></td>
</tr>
<tr>
<td>15</td>
<td>7.3: Open Space</td>
<td>Community garden and urban agriculture are great sources of healthy foods (<a href="http://www.tpchd.org/files/library/70324a57063cde36.pdf">http://www.tpchd.org/files/library/70324a57063cde36.pdf</a>). They should be allowed in all open space and residential land-uses designations.</td>
<td>Noted. Implementation policies will be added to a separate chapter that more directly deal with identifying areas for community gardening.</td>
<td></td>
</tr>
<tr>
<td>16</td>
<td>7.3: Open Space</td>
<td>Consider a new policy to “encourage private-public partnership to create on-site open space for public enjoyment in mixed-use areas and commercial areas”.</td>
<td>This recommended policy has been added as Policy CD-4.4.</td>
<td></td>
</tr>
<tr>
<td>17</td>
<td>7.4: Public Space</td>
<td>Consider the introduction of form-based code to implement the great policies in this section.</td>
<td>Noted. The City will be preparing a separate Implementation Element that will identify that steps the City will take to implement all of the goals of the Comprehensive Plan. The use of form based codes will be presented as an option.</td>
<td></td>
</tr>
<tr>
<td>18</td>
<td>7.4: Public Space</td>
<td>Are there any buildings with historic or architectural significance in Bonney Lake? If so, you may consider introducing policies to protect and preserve those buildings. Research evidence shows that historic places can attract people to congregate and visit, rejuvenate the area and, ultimately, improve our health.</td>
<td>The City does have historic buildings and places. Policies to protect and preserve those resources, along with an inventory and way finding program, are contained in the City’s Culture and Heritage Element. In addition to historic resources, the Element also address the need to facilitate the visual and performing arts in the City of Bonney Lake.</td>
<td></td>
</tr>

## COMMUNITY DEVELOPMENT ELEMENT

September 26, 2014

| TPCHD | 19  | Section 7.6 Gateways | Creating gateways and focal areas in neighborhoods and districts can promote a sense of place and community unique to that particular place. They are great tools for community building and place-making ([www.tpchd.org/files/library/7a22a11a0c3f5e07.pdf](http://www.tpchd.org/files/library/7a22a11a0c3f5e07.pdf)). | Noted. |
| TPCHD | 20  | Section 7.7: Guiding Development | Goal CD-7–TPCHD recommends the addition of the language “to address the needs of the underserved areas” after the words “leverages public investment” to reduce health disparity often occurred among those who live in underserved neighborhoods. | Recommendation added to Goal CD-7. |
| Tacoma Pierce County Affordable Housing Consortium (TPCAHC) | 1   | Section 7.2: Housing | Thanks very much for sending this along. I read the Neighborhoods & Centers and Housing sections of the draft Bonney Lake Comp Plan. Your description and data related to housing needs of low-income households is very helpful for policy-makers and residents, particularly by using standard – and easy to understand – definitions of housing affordability, income brackets, and rent burden. | Noted |
| TPCAHC | 2   | N/A | If we can assist you in any way, please let me know. Members of our organization, both nonprofit and for-profit, have helped develop policy recommendations for Pierce County and for City of Tacoma *. I’m also working with a group in Puyallup on housing affordability. | Noted |
The overall recommendations of the Tacoma Affordable Housing Policy Advisory Group [appointed by the City Council] listed below were approved by the Council in 2011. We are still working on some of the details for implementation - for example, specific incentives for including affordable housing in market-rate housing projects - but hope to finish them up soon.

While Tacoma’s residents are lower-income overall than Bonney Lake's, the same principles can apply:
1 - Affordable Housing is Vital to Important Civic Interests
2 - Affordable Housing is Attractive, Innovative and Well Managed
3 - The City Needs to Enlist the Engine of Private Development
4 - Affordable Housing Developments Spur Other Investments
5 - The City Should Welcome Affordable Housing Developments
6 - Every City Neighborhood Needs Affordable Housing Developments
7 - Affordable Housing as Innovative Design
8 - Affordable Housing as a High City Priority Amid Competing Interests

The entire report and policy recommendations by the Affordable Housing Policy Advisory Group are attached, fyi.

## COMMUNITY DEVELOPMENT ELEMENT

*September 26, 2014*

| Feets First | 1 | N/A | Thanks for sharing this with Feets First. I would love to talk with you about how you are approaching your Comprehensive Plan update and how that approach incorporates walking. This will be helpful for other cities that are updating their plans this coming year. |

| Puget Sound Regional Council (PSRC) | 1 | Section 5 Projected Growth | Growth assumptions for the city should be clarified. Figure 3-9 includes an end year of 2040, while growth assumptions in the narrative assume a 2035 horizon year. Pierce County’s adopted growth targets extend to a 2030 horizon year. The element should provide some additional information to make the source, time period, and relevant geography for population, housing, and employment growth assumptions clear in order to maintain consistency and transparency. Figure 3-9, for example, can be updated to indicate what portion of growth is projected from growth planned for in the designated Potential Annexation Areas (PAAs). Growth in areas outside the city’s limits should be separated out from the city’s growth assumptions and coordinated with Pierce County. |

|   |   |   | Noted

This section has been updated per the comment. The City has provided additional clarification for the growth targets and has updated the graph. Please note not the 2040 is still left on for graphical purposes similar to the one that is in Vision 2040. A comparison of Bonney Lake 2030 growth projects and the Pierce County assigned growth is also now included in the section.
| PSRC | 2 | **Section 5**  
**Projected Growth** | Within the existing city boundaries, the Community Development element assumes population growth in excess of the adopted growth target. To ensure the city’s comprehensive plan remains coordinated with statewide, regional, and special district planning, the element should document the assumptions and rationale for the difference between the adopted targets and growth assumptions in the comprehensive plan, including financing assumptions. The plan should also describe how growth assumptions are consistent with VISION 2040 and the Regional Growth Strategy. | Please see comment above. Rational for the growth projections have been added to the section. |
|---|---|---|---|---|
| PSRC | 3 | **Section 4:**  
**Potential Annexation Areas** | Pierce County countywide planning policies (CPPs) out for ratification note that joint planning agreements should exist prior to expanding or updating existing PAAs. The policies also note that PAAs are areas within the urban growth boundary. Plan language should clarify that planning and coordination with the county would be required before the county could act to expand the urban growth area and assign the proposed PAAs to the city. For example, this text could potentially be included in introduction to the description of the proposed PAAs. | This section has been revised to reflect both current and proposed CPP. |
<table>
<thead>
<tr>
<th>PSRC</th>
<th>4</th>
<th>Section 6.1: Future Land Use Map</th>
<th>Hearings Board case law indicates that the jurisdiction should not assign land use designations on its Future Land Use Map to areas outside the city’s jurisdiction. We’d recommend reviewing the Future Land Use Map to remove land use designations from areas outside the county’s urban growth boundary.</th>
<th>The FLUM has been updated and designations have been removed from the areas outside of the adopted Bonney Lake Urban Growth Area.</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSRC</td>
<td>5</td>
<td>Section 4: Potential Annexation Areas</td>
<td>The plan describes several areas the city would like to include in its PAAs. Descriptions of some proposed annexation areas should be reviewed for consistency with other planning documents. Both descriptions of the 96th Avenue proposed expansion area and Entwhistle proposed expansion area state that “the intent of this expansion is not to provide additional capacity, but to establish a regular boundary between the City and rural Pierce County.” The future land use map designates these areas for commercial and low-density residential uses, and the city’s Eastown plan element (updated in 2011) notes that these areas are necessary for “business development and economic diversity.” The plan should be internally consistent on what the objectives would be in seeking to incorporate these areas into the urban growth area.</td>
<td>The language has been updated to ensure internal consistency of the City’s Comprehensive Plan.</td>
</tr>
<tr>
<td>PSRC</td>
<td>6</td>
<td>Section 3.3: Housing Stock</td>
<td>The plan element addresses existing housing stock and includes several goals and policies. In addition, the element could be strengthened by describing existing housing programs or strategies in place. The plan should also describe provisions and actions for meeting regional and local housing goals and targets, including affordable housing. As noted in PSRC's Plan Review Checklist, information should address implementation strategies and actions, as well as monitoring programs for addressing housing goals and targets.</td>
<td>Implementation and Performance measures for the entire Comprehensive Plan will be addressed in a separate chapter.</td>
</tr>
<tr>
<td>PSRC</td>
<td>7</td>
<td>Section 7.2: Housing</td>
<td>The housing inventory indicates a shortage of affordable housing for some income levels. Policy CD-3.5 (&quot;Ensure that there continues to be a sufficient supply of housing affordable to all income levels&quot;) should be reviewed to reference the existing affordability gap.</td>
<td>Staff has revised Policy CD-3.5 to recognize the affordability gap for extremely low-income households in Bonney Lake as provided below: <strong>Ensure that there continues to be a sufficient supply of housing affordable to all income levels by maintaining supply of housing that is currently affordable median income, low income and very low-income households and working to increase the supply of housing that is affordable to the extremely low income, very low income, and low income households within Bonney Lake.</strong></td>
</tr>
<tr>
<td>PSRC</td>
<td>8</td>
<td>Section 7.2: Housing</td>
<td>The housing section could be strengthened with additional information and discussion about existing conditions. The Washington Administrative Code offers helpful guidance on how to address the inventory and analysis component of the housing element. Additional information the city may want to incorporate includes relative amounts of existing rental and ownership housing, as well as considering data other than income to consider housing needs (e.g. household size, access to employment opportunities). PSRC recently produced a Housing Element Guide, which includes several methods to assess housing need. The element could also include additional discussion of the context of its housing need, given that the city's median income is significantly higher than the county as a whole.</td>
<td>The housing section has been updated to better discuss affordability and lifestyle housing. Additional demographics have also been added to the Existing Conditions section based on the recommendations in PSRC's Housing Element Guide Book.</td>
</tr>
<tr>
<td>PSRC</td>
<td>9</td>
<td>Section 8: Property Rights</td>
<td>The city may want to update its reference to the 1992 property rights memo - the Attorney General released a more recent (2006) advisory memo on takings that the city may want to cite instead.</td>
<td>The date of the document was removed so the reference is to the memo only.</td>
</tr>

<td>I’d love to see a trader joes in BL too! Personally I’d like to see Bonney Lake develop more in the meadows behind Target away from the highway. If we keep putting lights in on the highway and continue to put businesses along the highway it will no longer be a highway and will become like south hill. I avoid south hill like the plague! No one want to see that happen. You have to develop business centers that sprawl away from SR-410. Then create some activities and events that will bring people to these areas so they’re aware of the new shops. I understand the advertising the businesses for just being along the hwy, but you have got to come up with a better solution. My dad west on the city council for years, I know he feels the same way.</td>
<td>The City’s draft Community Development Element includes policies calling for the development of other neighborhood centers see Policy CD-2.13. The goal of developing centers is to provide places for people to shop for daily items without always having to drive to the store. Additionally, the draft Community Development Element calls for the development of more multi-modal facilities so that residents can access the stores along SR-401 without always having to drive. Additionally, the City’s Mobility Element will evaluate traffic flow along SR-410 to identify steps needed to mitigate future development to ensure that traffic can move along SR-410.</td>

### Patricia Day Lucas

**Comment via Facebook:** You need to invite developers that will build low income senior housing.

**Response:** Policy CD-3.2 of the draft Community Development Element specifically identifies the need for the City to encourage the development of senior housing. Additionally, the City Council recently amended the zoning code to allow Senior Assisted Living facilities in the downtown so that these types of facilities would be near the police station, library, transit health care, and eventually the new senior center.

### Nancy Sciba

**Comment via Facebook:** I've lived in BL [Bonney Lake] for 20 years I was sad to see the cute Italian restaurant transition to a nightclub and then ultimately a pawn shop. Down the road on Veteran's is the bikini coffee stand. Still I can say that I am finally seeing a look emerge that feels like home. Places like Revive Hot Yoga, Fleet Feet, Target Pet(co and Smart) and Hopjack's are more my speed. I still dream of a Trader Joe's going into the old Albertson's space. I'd love to see a restaurant that isn’t a chain or fast food. I know those are such a challenge for a business owner (IE Whitehouse) but not everybody wants to Eat at Applebee's or Red Robin. I would LOVE to keep as much as my spending in BL as possible.

**Response:** Noted
Memo

Date : September 26, 2014
To : Mayor Johnson
CC : Don Morrison – City Administrator
From : Jason Sullivan – Senior Planner
Re : Community Development Element

PURPOSE:

The purpose of this memo is to provide an updated version of the Memo that was provided on July 17, 2014 to City Administration related to proposed changes to the Bonney Lake Future Land Use Map (FLUM) and the combination of the Land Use, Housing, and Community Character Elements into one element as part of the update to the Bonney Lake Comprehensive Plan. Since that briefing memo was prepared, the Planning Commission has held the public hearing and received public comments on the draft Community Development Element. As the Community Development Element is scheduled to be present to the City Council on October 7th, staff was requested to provide an updated version of its July 17th briefing memo to City Administration.

BACKGROUND:

The City of Bonney Lake is currently updating its comprehensive plan and development regulations as required by RCW 36.70A.130. As part of this periodic review and update, the City has identified a number of changes that are required to ensure compliance with the Growth Management Act (GMA). In addition to the required changes, a number of optional changes have been proposed to be made as part of the update process. The proposed changes to the FLUM, the Land Use Element, the Housing Element, and the Community Character Element are the result of the following:

- **2015 Comprehensive Plan Update – Scope of Work and Public Participation Plan** (Scope of Work and PPP) adopted on October 22, 2013 pursuant to Resolution 2320. The Scope of Work and PPP established the framework and initial breath of the update of the City’s comprehensive plan.
• 2015 Comprehensive Plan Update – Consistency Report (Consistency Report) adopted on May 13, 2014 pursuant to Resolution 2379. This report identified a number of mandatory changes to the FLUM, the Land Use Element, and the Housing Element.

• 2014 – 2015 Planning Commission Work Plan adopted on January 14, 2014 pursuant to Resolution 2347 and amended on May 27, 2014 pursuant to Resolution 2385. During the adoption of the work plan, the Planning Commission was asked to explore the expansion of the neighborhood commercial designation as part of the review of the FLUM.

• Comprehensive Plan Update – Public Open House #1 held on June 18, 2014. This was the first of three open houses planned as part of the comprehensive plan update process and focused on the FLUM, the Land Use Element, and the Housing Element.

• Public Comments. The City received a number of public comments from the public via Facebook and other agencies. The comments along with the City’s response is also attached to this memo.

DISCUSSION:

Future Land Use Map

Changes proposed to the existing FLUM are discussed below:

• Modifications were made to the open space designations which included the establishment of a private open space designation, the separation of the existing conservancy/park designation into two separate designations – (1) conservancy and (2) public open space, and replacing the Fennel Creek Designation with one of the three new open space designations based on the current status of the property. Areas designated as private open space would not result in a change to current zoning as the designation is meant to coincide with known critical areas, open space tracts, and park tracts owned by Homeowner Associations. Areas designated as conservancy or public open space would have a corresponding zoning classification of RC-5: consistent with the way areas currently designated conservancy/park are zoned RC-5. The public open space designation does not mean that the area is open to the public, but that the area is owned by a public agency and not a private entity.

The changes to the open space designations were done to clearly and conspicuously identify opens space corridors within the City. In the past, the City has pointed to its critical areas and parks mapping to comply with this requirement. However, this approach did not fulfill the requirements of RCW 36.70A.160 as determined by the Central Puget Sound Growth Management Hearings Board. The establishment of open space corridors was
identified as mandatory change to the FLUM in the Consistency Report. These open space areas are shades of green on the FLUM.

- The draft FLUM includes the establishment of one new neighborhood commercial area at the old City Hall site. The identification of a new neighborhood commercial area was not a required change, but was discussed as one of the items to be included as part of the work to revise the FLUM in the Planning Commission’s 2014 – 2015 Work Plan. The proposed additional neighborhood commercial areas are red on the FLUM. The amendment to make this change will occur in 2014 prior to the adoption of the comprehensive plan update.

- The downtown commercial designation was extended to include the commercial properties on the south side of SR-410 and to the north of the existing downtown area. Enlarging the downtown commercial designation to include the commercial properties on the south side of SR-410 was discussed as a possibility during the conversation to amend the land use matrix to add assisted senior housing to the list of permitted use in the Downtown. Expansion of the downtown commercial was also identified as a suggestion by the public at the June 18, 2014 Open House.

- A small area adjacent to Church Lake Drive is proposed to be changed from low density residential to medium density residential as the result of comments received during the Open House. The majority of this area is already developed at densities and lot sizes that area more similar to the medium density designation and not the low density designation.

- All of the designations for areas outside of the adopted BLUGA were removed from the FLUM. The removal of these designation was as the result of a comment provided by PSRC. Including these areas was a violation of the GMA as provided in Growth Management Hearings Board case law which indicates that the jurisdiction cannot assign land use designations on its Future Land Use Map to areas outside the city’s jurisdiction.

**Land Use, Housing, and Community Character Elements**

Given the number of required changes to both the Land Use and Housing Elements identified in the Consistency Report, both elements had to be substantially rewritten. During the redrafting of each of the elements, staff realized that there was a significant amount of redundancy in the text of both elements given the highly interrelatedness of housing and land use. In order to reduce the redundancy in the City’s comprehensive plan, as provide in the Scope of Work, the current draft version of the updated Bonney Lake Comprehensive Plan proposes to combine the Land Use and Housing Elements into one element currently identified as the Community Development Element. There is no prohibition in the GMA against combining elements; provided, the consolidated element includes the mandatory components as established by the GMA. The name of the element
was selected as the topics covered in the element have the most direct effect on the development pattern within Bonney Lake.

After completing a updating the Community Character Element, staff realized that the information contained in the existing Community Character Element is also addressed in the Community Development Element; the Environmental Conservation Element; and the Arts and Cultural Resources, and Heritage Element. As the Community Character Element is an optional element, that did not add information not already covered in other elements, the information was relocated to different elements of the Comprehensive Plan.

Staff believes that combining the three elements will reduce the overall length of the document, improves readability for the general public, and reduces the risk of internal inconsistency by having all of the growth projections in one chapter. The high degree of internal inconsistency in the City’s current comprehensive plan is the main reason for the City’s conditional certification by the PSRC.
Date : October 1, 2014
To : Mayor and City Council
From : Grant Sulham, Planning Commission Chair
Re : Resolution 2404 – Community Development Element

The City of Bonney Lake is required to review and, if needed, update its comprehensive plan and development regulations to ensure compliance with the Washington State Growth Management Act (GMA), Chapter 36.70A RCW, by June 30, 2015 pursuant to RCW 36.70A.130. This periodic review and update of the City’s comprehensive plan and development regulations is necessary to ensure that the City’s comprehensive plan and development regulations reflect current laws, local needs and goals, and new data. The GMA does not exempt any portion of a comprehensive plan or development regulation from being subject to review and evaluation as part of the required period update. Annual amendments made to a Comprehensive Plan typically focus on specific sections or changes, but the periodic update is required to assess the plan as a whole.

The draft version of the Community Development Element was reviewed by the Planning Commission on May 21, 2014, June 4, 2014, July 2, 2014 and July 16, 2014. Following this review, City staff provided notices that the Planning Commission would hold a public hearing on August 13, 2014 to consider and make recommendations on Community Development Element. At the August 13, 2014 meeting, the Public Hearing was extended in order to give staff sufficient time to review and respond to the public comments.

At the October 1, 2014 meeting, the Planning Commission closed the public hearing and voted five to one that the City Council adopt Resolution 2404 stating the City Council’s intent to adopt the Community Development Element as part of the Comprehensive Plan update.

City of Bonney Lake, Washington

City Council Agenda Bill (AB)

Department/Staff Contact: Community Development/ Jason Sullivan - Senior Planner

Meeting/Workshop Date: October 14, 2014

Agenda Bill Number: AB14-103

Agenda Item Type: Resolution

Ordinance/Resolution Number: 2404

Councilmember Sponsor: Donn Lewis

Agenda Subject: Bonney Lake Comprehensive Plan Update - Community Development Element

Full Title/Motion: A resolution of the City Council of the City of Bonney Lake, Pierce County, Washington expressing the intent to adopt a Community Development Element.

Administrative Recommendation:

Background Summary:
The City is currently updating its comprehensive plan and development regulations as required by RCW 36.70A.130. As part of this periodic review and update, the City has identified a number of changes that are required to ensure compliance with the Growth Management Act (GMA). In addition to the required changes, a number of optional changes have been proposed to be made as part of the update process.

The Community Development Element combines the required Land Use and Housing Elements, along with the optional Community Character Element, into one element. There is no prohibition in the GMA against combining elements; provided, the consolidated element includes the mandatory components as established by the GMA. Staff believes that combining the three elements will reduce the overall length of the document, improves readability for the general public, and reduces the risk of internal inconsistency.
